Rationale	The ability to interpret and apply scriptural texts is foundational to every area of Christian study, belief and ministry. To do this well, students require foundational skills of interpretation and application needed for their study of the Word of God. Students will also engage in an introductory overview to biblical Hebrew and Greek. Selected hermeneutical models used throughout the church's history will be examined and applied to gain a greater understanding of the intended meaning of various passages of Scripture. Students will develop skills in exegeting, interpreting and applying the various literary genres found in the Bible. Students will learn to use a variety of Bible study tools and research methods that will enable them to interpret the Bible for themselves. They will also be challenged to reflect on their own hermeneutical approaches and the way these are shaped by contemporary contexts.
