Rationale	<u>Enduring Understanding:</u> Curriculum, assessment and reporting in secondary school contexts involve discovery, responsibility and communication between the teacher and their students, and also between the teacher and key stakeholders. This unit assists pre-service teachers in the secondary (7-12) context to develop the professional responsibilities required of the secondary teacher to ethically assess, evaluate and report on the learning needs of students in their care. The multifaceted nature of this process requires pre-service teachers to observe, plan and critique current assessment and feedback practices in the secondary school context while also considering ethical issues regarding these practices. Healthy partnerships amongst parents, colleagues and representatives of professional agencies also need to be negotiated to ensure quality outcomes for each individual child, and secondary pre-service teachers need to develop their communication skills in relation to these processes. This unit is designed to build pre-service teachers' knowledge and understandings of assessment, evaluation and reporting, and then to assist them with planning, designing and producing authentic and ethical tools, tasks and strategies for secondary (7-12) learners. The unit will focus on meaningful, authentic and integrated tasks that link assessment with learning.
